Summary

As a full stack web developer with a background in business partnership management, I excel at project planning and organization. I can keep myself and my teammates on track to create interactive, creative, and clean web apps that meet client expectations.

Skills

- JavaScript
- Express
- Ember.js
- Ruby
- Ruby on Rails
- HTML/CSS
- Bootstrap
- Handlebars
- MongoDB
- Git/Github
- JQuery
- Sass

Education

General Assembly, Web Development Immersive

Jan –April 2016

During a 12-week bootcamp, I created full stack web applications such as:

EarthWars: an Earth Week App

Built with Ember and Rails, employees track their environmentally friendly activities to win prizes

The Fridge File Storage

A full stack, deployed single page web app, using MongoDB API and uploading to Amazon Web Services S3.

University of Cincinnati, B.S. in Biology, concentration in Ecology

2010

Awarded outstanding graduating senior in the Biology department

Experience

Next Step Living, Boston, MA

Aug 2012 – Dec 2015

I worked my way up from an entry level role to managing a major business partnership:

Division Trainer and Partnership Manager

Managed the company's relationship with NRG Home Solar and coached remote call centers, doubling their performance. (4 months)

Inside Sales Trainer

Trained 100 employees in sales and Salesforce.com (9 months)

Community Outreach Coordinator

Organized 1500+ sustainability events for a team that generated 13,000 customer leads (2 years)

Outreach Event Representative

Traveled to community events, and pitched energy efficiency services (4 months)

AmeriCorps for Cornell Cooperative Extension, Cortland, NY

Nov 2010-June 2012

Wrote and delivered 4-H afterschool science programs.
