(2010)

Web Development Experience

Web Development Immersive Course
August - November 2016/ General Assembly, Boston MA

Complete course over 12 weeks and strengthen full-stack development skills through practical programming projects while applying industry best practices in a collaborative environment. Notable Projects include:

Jeopardy Client & Rails API
Developed fully functional Jeopardy Game using complex modelling through a custom built Rails API, as well as corresponding front-end SPA client for user playability.

Keepr Ember Client & Rails API
Built over the course of a six-day sprint, Keepr is a fully-functional Ember client featuring dynamic data rendering and a strong focus on UX, supported by a Rails backend.

Desert Island Client & Node.js API
Worked with three other developers on a custom Express.js application, effectively using AGILE programming principles and established gitflow practices.

Digital Narrative Residency
May 2016 / Banff Centre, Banff Alberta

Over the course of 3 weeks, built out an interactive, interlinking hypertext story that functions in the browser and on mobile, using advanced CSS and jQuery techniques.

Career History

2013 – 2016 / Sales Operations Manager
Pearson Education, Boston MA
Developed and assisted in creating custom educational solutions for over fifty higher educational institutions in the Mid-Atlantic Region.

2011 - 2013 / Assistant Derivative Rights Editor
Pearson Learning Solutions, Boston MA
Facilitated Rights acquisitions and permissions for custom media and print projects.
